Ganesh Kumar Reddy Meenige

Data Scientist and Machine Learning Engineer
ganeshreddym717@gmail.com | +91 9010545180 | Racherla ,Prakasam ,AndraPradesh
GitHub | **Linkedin** | **LeetCode** | **HackerRank** | **Portfolio**

Education

Rajiv Gandhi University of Knowledge and Technologies-Ongole — Kadapa,Andra Pradesh
Pre-University Course MPC — July 2018 - May 2020
CGPA: 9.45

Rajiv Gandhi University of Knowledge and Technologies-Ongole — Ongole,Andra Pradesh
BTech Computer Sceience and Engineering — July 2020 - April 2024
CGPA: 9.5

Experience

Code Clause | Data Science Intern — Virtual Internship | Jul 2023 - Aug 2023

In my data science internship, I acquired essential concepts and skills, which I promptly applied in real-world projects. From detecting fake news to sentiment analysis, iris flower identification, and next word prediction, I gained practical experience that solidified my understanding of data science's practical applications. Gained Experience on Machine Learning and Deep Learning Algorithms.

Skills

Programming Languages:	C, JAVA, Python, HTML, CSS, Javascript, PHP, Data Structures, oops, SQL
Libraries/Frameworks:	Bootstrap, React Js, Node Js, Express Js, Tkinter
Tools / Platforms:	Git and Git hub, Visual Studio, Jupyter Notebook, pycharm, Tableau
Databases:	MySQL, mongoDB

Projects / Open-Source

farmAtech | Link — *HTML, CSS, JAVASCRIPT, BOOTSTRAP, PHP, SQL, XAMPP server*

- roviding e-services to farmers offers a comprehensive digital platform that facilitates access to crucial resources such as crops, seeds, market views, farming tools, weather updates, news, and detailed crop information. This integrated approach empowers farmers with their overall agricultural productivity.

Online Voting | Link — *HTML, CSS, BOOTSTRAP, JAVASCRIPT, JQUERY, MYSQL, AJAX and PHP*

- Our online voting system offers a convenient and secure platform for citizens to cast their votes remotely. Through a user-friendly interface, voters can participate in elections from any location, ensuring inclusivity and accessibility.

Iris flower Classification | Link — *Python, Data Science, Machine Learning Algorithms*

- Implemented an iris flower classification model using Python and scikit-learn, showcasing proficiency in data preprocessing, model training, and evaluation. Achieved accurate species classification through supervised learning, demonstrating strong analytical skills and practical machine learning expertise.

Tic Tac Toe | Link — *Python, Tkinter Library*

- I developed a Tic Tac Toe game project to showcase my problem-solving abilities and Python programming skills. By creating a functional and interactive game environment.

Certifications

- SQL Course Completition - **bitlabs**
- Python - **Hackerrank**
- Machine Learning - **Simplilearn**
- Problem Solving - **Hackernk**

Honors & Awards

Secured AIR 22882 rank in GATE 2023

Solved 200+ Data Structures and Algorithms problem on different platforms using pyhton java and c languages.
